This file lists all ToDos for all L ^A T _E X-Packages and Classes in this Repo		

1 TODO Rework Readme

- Installation is very outdated
- cheatsheet is not present in readme
- info about CTAN

2 cheatsheet

- ☐ BUG: Footnotes appear all on the first page

3 HomeworkAssignment

3.1 TODO [33%] v3.0

- ☒ Rename to homeworkassignment
 - To comply to CTANs requirements of all lowercase packagenames.

- ☐ Add proof by contradiction environment
- ☐ Create environments for all existing proofs
- ☒ [2/2] Add points for exercises
 - ☒ Expand `\newproblem` `\newsproblem` etc by an optional argument to take the maximum ammount of point one can gain at this problem.
 - * ☒ When passed this is passed to `\newsproblem`, create a box to write the points down
 - * ☒ Add this number of points to the »gradingtable«
 - ☒ To implement this, the existing optional argument, taking the exercise number has to be replaced with an own command
 - * replace the optional argument of `\newproblem` by a new command `\setproblemnumber`
 - Solved different
- ☐ Add Option to remove the hlines from the layout
 - Standard `hlines=all`
 - `hlines=none` remove all
 - `hlines=header` just remove the hlines around the Title
- ☐ Remove legacy styles
- ☐ Update Docu

3.2 TODO [0/1] v3.?

- ☐ Unite Implementation and DDocumentation part of Documentation
