The HomeworkAssignment class*

Adrian C Hinrichs adrian.hinrichs@rwth-aachen.de

May 4, 2017

1 Abstract

This class provides a relative simple document—type for homework, mainly created for assignments at the University This class is inherited from article, it is not perfect, but I am trying my verry best.

2 Options

problemstyle=<1>
subproblemstyle=<1>
subsubproblemstyle=<1>

These options allow the customizatuion of the displayed numbers. For Example, if problemstyle=Roman, subproblemstyle=arabic, subsubproblemstyle=roman is passed, The first subsubproblem of the first subproblem of the first problem would be labled as i) of **Problem I.1**.

Available options are arabic, Alph, alph, Roman, and roman. Standard values are: problemstyle=arabic, subproblemstyle=alph, subsubproblemstyle=roman.

2.1 Inherited options

Because the class is inherited by Abstract, every Option that can be passed to article, will be passed to article.

2.2 LATEXWarning: Unused global option(s)

Because the Options are handled via kvoptions and passed directly to article, LaTeXraises this warning. IMHO, the Options are used and this warning can be ignored. Nevertheless I am working on it.

3 Commands

3.1 Document Informations

\subject \kurs

Sets the subject of the document. Takes the subject as argument. Standard Value

^{*}This document corresponds to HomeworkAssignment v1.5.2,dated $2017\04\30$.

is "Kein Kurs" \kurs is deprecated.

\tutorial \tutorium

Sets the tutorial of the author. Takes it as an argument. Stamdard Value is empty, so that this command can be omitted.

\tutorium is deprecated.

\deadline \abgabe Sets the deadline of the document. Takes it as an argument. Standard value is \today.

\abgabe is deprecated

3.1.1 Inherited from article

\author \date

Sets the author of the document.

Sets the date of the document.

3.2 Sectioning

Because the class is designed for Assignments, the sectioning-commands are different from Article

3.2.1 'plain' Sectioning

\problem \subproblem \subsubproblem These commands work like theyr counterpart in article, except that there will be no number, nor will they increase a counter. Nevertheless, hey will be shown in the table of contents.

\solution \proof \given \toShow They work like Paragraph, but do not take an argument, instead they print out "Lösung", "Beweis" "Gegeben", and "Zu zeigen", respectively¹. They are not mentioned in the table of contents.

3.2.2 'better' Sectioning

The following commands are an augmented version of the "plain" commands.

These commands require no argument, and automatically create a numbered title. The optional Argument is the new value for the coresponding counter.

\newsubproblem
newsubsubproblem

4 Pagestyle

4.1 Headers

¹As of v1.6, Translations are added, depending on the choosen Language, there may be an other Text displayes.

See 7.2 for all Translations

5 Development and support

The package is developed at github:

https://github.com/ACHinrichs/LaTeX-templates

Please refer to that site for any bug report or development information.

6 Changelog

```
v1.0 - 2016/10/23 Intial
```

v1.1 - 2016/11/02 ...

 $v1.2 - 2016/11/03 \dots$

v1.3 - $2016/12/01\,$ Provide the Class as .dtx file and more

v1.4 - 2017/04/29 "Minor" bugfixes

 ${
m v1.5}$ - ${
m 2017/04/29}$ Problems are displayed in the table of contents. Type of numeration is now configurable.

v1.5.1 - 2017/04/29 Bugfix

v1.5.2 - 2017/04/29 Add version-number

v1.6 - 2017/05/02 Add Translations (German and English) Add \given and \toShow

7 Implementation

The following part is verry boring, but I have not found a solution to create a .cls-file without including the implementation into the document. Loads LATEX2e and sets the Version Loads the article, which is the base-class.

7.1 Packages Options

```
1 \RequirePackage{kvoptions}
2 \SetupKeyvalOptions{ family=hwa,
3 prefix=hwa@ }
4 \DeclareStringOption[arabic] {problemsty}
5 \DeclareStringOption[alph]{subproblemsty}
6 \DeclareStringOption[roman] {subsubproblemsty}
7 % Redefine the article-options
       \begin{macrocode}
8 %
9 \DeclareDefaultOption{\PassOptionsToClass{\CurrentOptionKey}{article}}
   Processes the Options and loades article
10 \ProcessKeyvalOptions*
11 \LoadClass{article}
   Loads required Packages
12 \RequirePackage{suffix} \RequirePackage{fancyhdr}
13 \RequirePackage{ifthen}
14 \RequirePackage{translations}
```

7.2 Translations

Load translations, currently supports English and German, Fallback is German

```
15 \DeclareTranslationFallback{aufgabe}{Aufgabe}
16 \DeclareTranslationFallback{loesung}{L\"osung}
17 \DeclareTranslationFallback{beweis}{Beweis}
18 \DeclareTranslationFallback{uebungsgruppe}{\"Ubungsgruppe}
19 \DeclareTranslationFallback{abgabe}{Abgabe}
20 \DeclareTranslationFallback{zuZeigen}{Zu zeigen}
21 \DeclareTranslationFallback{gegeben}{Gegeben}
23 \DeclareTranslation{German}{aufgabe}{Aufgabe}
24 \DeclareTranslation{German}{loesung}{L\"osung}
25 \DeclareTranslation{German}{beweis}{Beweis}
26 \DeclareTranslation{German}{uebungsgruppe}{\"Ubungsgruppe}
27 \DeclareTranslation{German}{abgabe}{Abgabe}
28 \DeclareTranslation{German}{zuZeigen}{Zu zeigen:}
29 \DeclareTranslation{German}{gegeben}{Gegeben}
31 \DeclareTranslation{English}{aufgabe}{Problem}
32 \DeclareTranslation{English}{loesung}{Solution}
33 \DeclareTranslation{English}{beweis}{Proof}
34 \DeclareTranslation{English}{uebungsgruppe}{Tutorial}
35 \DeclareTranslation{English}{abgabe}{Deadline}
```

```
36 \DeclareTranslation{English}{zuZeigen}{To show} 37 \DeclareTranslation{German}{gegeben}{Given}
```

7.3 Headers Footers

Sets the page-headers.

All headers are cleread before they get any Text — just to be sure.

The headers look like specified above (4.1). Also inserts the Titlepage.

```
39 \fancypagestyle{firstpage}{
   %
40
    \fancyhf{}
41
   % clear all six fields
42
   \renewcommand{\headrulewidth}{.7pt}
    \renewcommand{\footrulewidth}{Opt} \fancyfoot[RE,LO]{\thepage}
    \fancyhead[L]{\hwa@tutorium } \fancyhead[R]{\@date } }
45
46 \fancypagestyle{followingpage}{
47
    \fancyhf{}
48
49
    % clear all six fields
50
    \fancyhead[RE,L0]{\dauthor} \fancyhead[LE,R0]{\hwa@kurs\\ \GetTranslation{abgabe}:
      \hwa@abgabe \fancyfoot [RE,LO] {\thepage}
51
    \renewcommand{\headrulewidth}{0.7pt}
52
    \renewcommand{\footrulewidth}{Opt} } \pagestyle{followingpage}
53
54 \AtBeginDocument{ \thispagestyle{firstpage}
    \setlength{\headheight}{25pt} }
```

7.4 Internal commands

7.4.1 Counter-Commands

Counter--Commands

These are used to output the Exercise numbers in the desired style

```
56 \mbox{ } \mbox{newcommand{\hwa@problemno}{\arabic{problem}}}
```

- 57 \newcommand{\hwa@subproblemno}{\alph{subproblem}}
- 58 \newcommand{\hwa@subsubproblemno}{\roman{subsubproblem}}

7.4.2 Counter-Style Parser

Counter--Style Parser

This takes a style-input (#1), one of the three previous defined commands (#2) and the coresponding counter (#3) to redefine #1, so that it corresponds to #2. See 7.3.3 for example usement.

```
59 \newcommand{\hwa@parseCounterStyle}[3]{
60 \ifthenelse{\equal{#1}{arabic}}{ \renewcommand{#2}{\arabic{#3}} }{
61 \ifthenelse{\equal{#1}{arabic}}{ \renewcommand{#2}{\arabic{#3}} }{
62 \ifthenelse{\equal{#1}{alph}}{ \renewcommand{#2}{\alph{#3}} }{
63 \ifthenelse{\equal{#1}{Alph}}{ \renewcommand{#2}{\Alph{#3}} }{
64 \ifthenelse{\equal{#1}{Roman}}{
65 \renewcommand{#2}{\Roman{#3}} }{
```

```
option Counter-Styling}{Possible Values are alph,
                                                                         67
                                                                                                              arabic, Arabic, roman or Roman.} } } } } }
                                                                         68
                                                                                          Counter-Commands II
ounter--Style ParserCommands II Redefines the three counter-commands
                                                                         69 \hwa@parseCounterStyle{\hwa@problemsty}{\hwa@problemno}{problem}
                                                                         70 \hwa@parseCounterStyle{\hwa@subproblemsty}{\hwa@subproblemn}{subproblem}
                                                                         \label{thm:continuity} % The algorithm of the continuity of the 
                                                                         7.5
                                                                                       Commands
                                                  \subject Defines \kurs. \subject equals \kurs
                                                                         72 \newcommand{\hwa@kurs}{?\GetTranslation{subject}?}
                                                                         73 \newcommand{\subject}[1]{\renewcommand{\hwa@kurs}{#1}}
                                                                         74 \newcommand{\kurs}[1]{\subject{#1}}
                                                \tutorial Defines \tutorial. \tutorium equals \tutorial
                                                                         75 \newcommand{\hwa@tutorium}{?\GetTranslation{uebungsgruppe}?}
                                                                         76 \newcommand{\tutorial}[1]{\renewcommand{\hwa@tutorium}{#1}}
                                                                         77 \newcommand{\tutorium}[1]{\tutorial{#1}}
                                                \deadline Defines \deadline. \abgabe equals \deadline
                                                                         78 \newcommand{\hwa@abgabe}{\today}
                                                                         79 \newcommand{\deadline}[1]{\def\hwa@abgabe{#1}}
                                                                         80 \newcommand{\abgabe}[1]{\deadline{#1}}
                                              \maketitle Overrides maketitle.
                                                                         82 \renewcommand{\maketitle} {
                                                                                   \begin{centering}
                                                                         83
                                                                                        \huge{\textbf{\hwa@kurs}} {\hrule height 2pt} \vspace{.25cm}
                                                                         84
                                                                         85
                                                                                        \GetTranslation{abgabe}: \hwa@abgabe\\
                                                                         86
                                                                                        \vspace{.5cm} \hrule \vspace{.25cm}
                                                                         87
                                                                                        \normalsize{\@author}\\
                                                                                        \vspace{.25cm} \hrule \vspace{.25cm} \normalsize
                                                                         89
                                                                         90
                                                                                  \end{centering}
                                                                         91 }
                                                                         Defines and initialize all counters.
                                                                         92 \newcounter{problem} \setcounter{problem}{0}
