Contents

This file lists all ToDos for all LaTeX-Packages and Classes in this Repo

1 cheatsheet

- ☐ BUG: Footnotes appear all on the first page

2 HomeworkAssignment

2.1 **TODO** v3.0 [20%]

- ☒ Rename to homeworkassignment

    - To comply to CTANs requirements of all lowercase packagenames.

- ☐ Add proof by contradiction environment

- ☐ Create environments for all existing proofs

- ☐ Add points for excercises

    - Expand \{} newproblem newsubproblem etc by an optional argument to take the maximum ammount of point one can gain at this problem.
        * When passed this is passed to \newsubproblem, create a box to write the points down

* Add this number of points to the »gradingtable«
  – To implement this, the existing optional argument, taking the exercise number has to be replaced with an own command
    * □ replace the optional argument of \newproblem by a new command \setproblemnumber

- □ Add Option to remove the hlines from the layout

  – Standard hlines=all
  – hlines=none remove all
  – hlines=header just remove the hlines around the Title
